Re: Reclassification Status

Sisters and Brothers,

As per our Bulletin dated December 20, 2007, we stated that the reclassifications negotiated would be confirmed by mid January. The Company has almost completed the list, however, there have been delays due to vacations, and a few technicians have not notified the Company of their intent to accept or decline the reclassification.

With respect to the technicians not responding to the Company, I have suggested that the Company send registered letters to these technicians to ensure that they receive the notice, thereby advising them of their reclassification status and allowing them 48 hours to respond. If they decline to respond we will continue on down the list.

We hope to have this resolved ASAP. Thank you for your patience.

In solidarity,

K.L. Beemer
